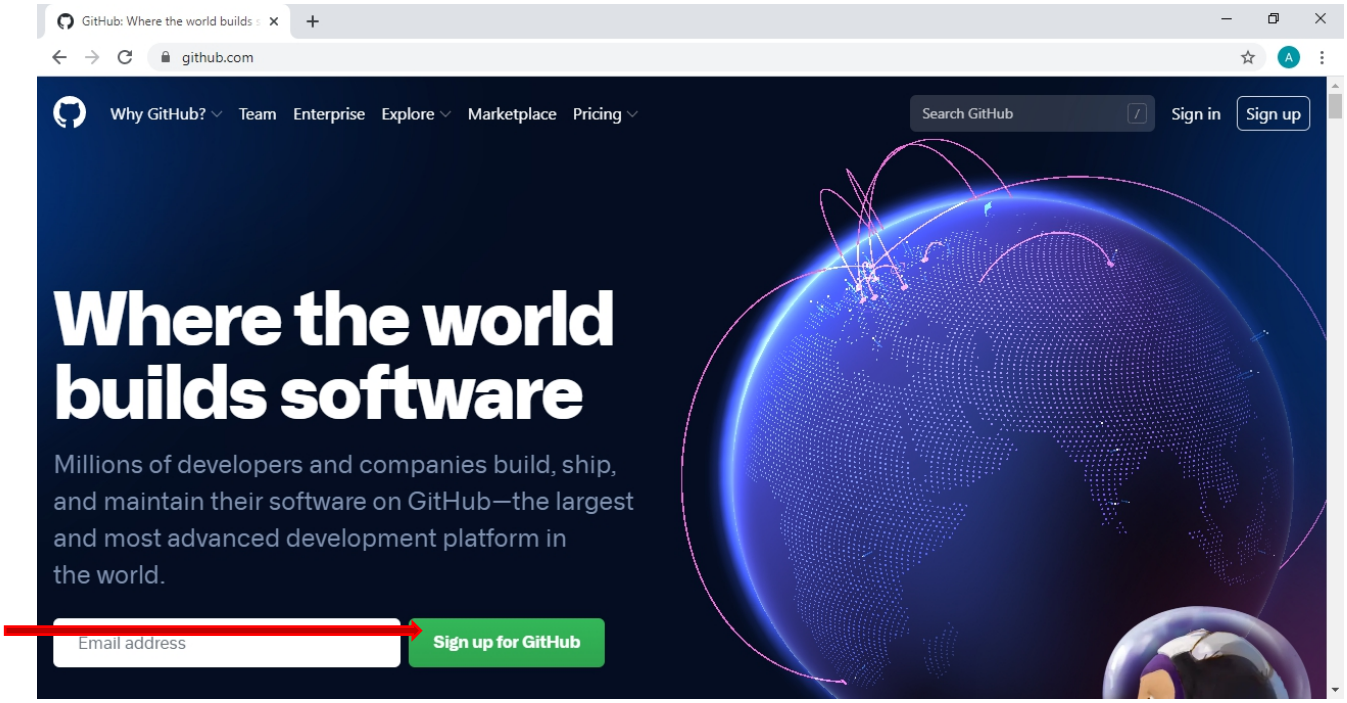
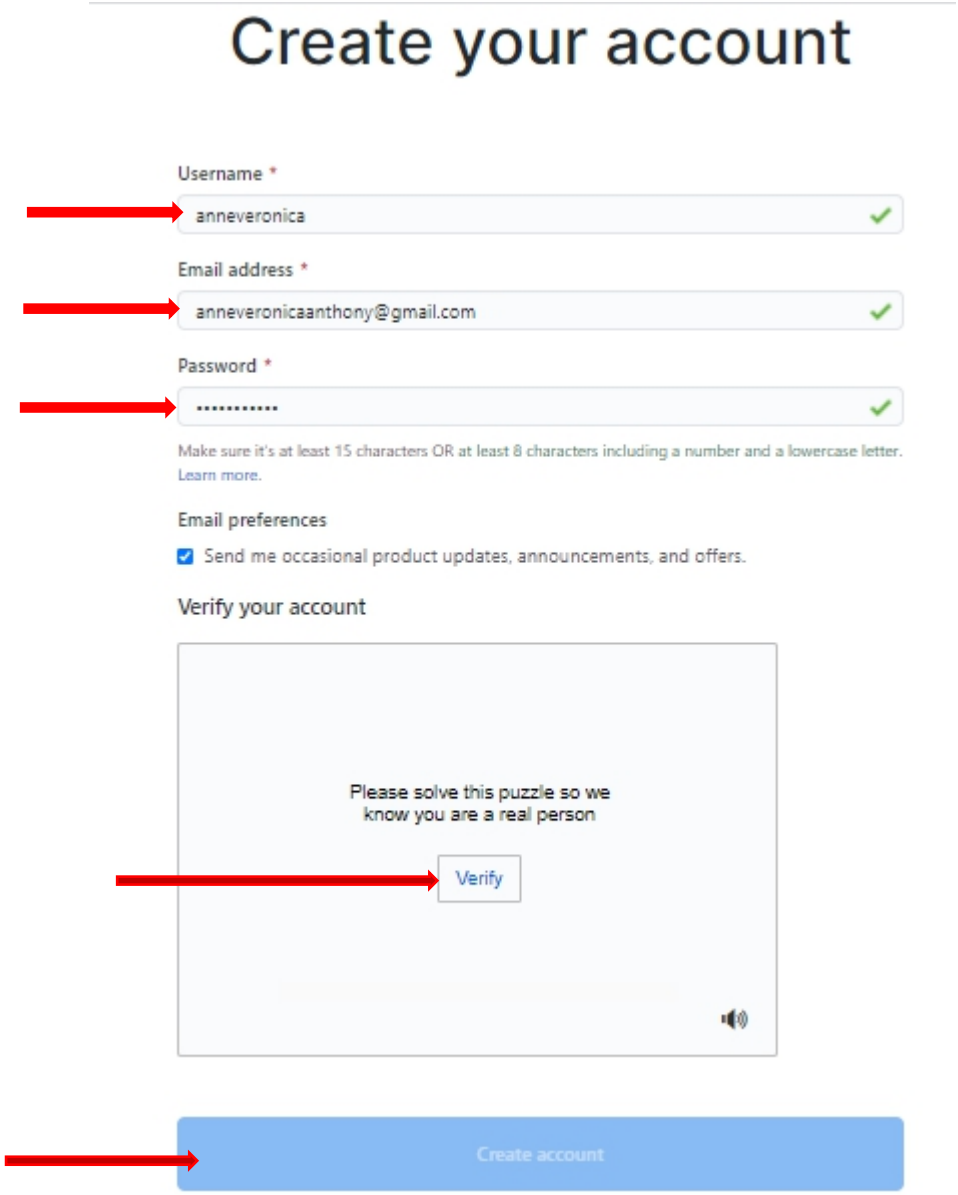
Practical 2: Creating account, repository on Github and cloning repository in Github

a) Creating Account

Step 1: Go to Github website and click on the “sign up” button.

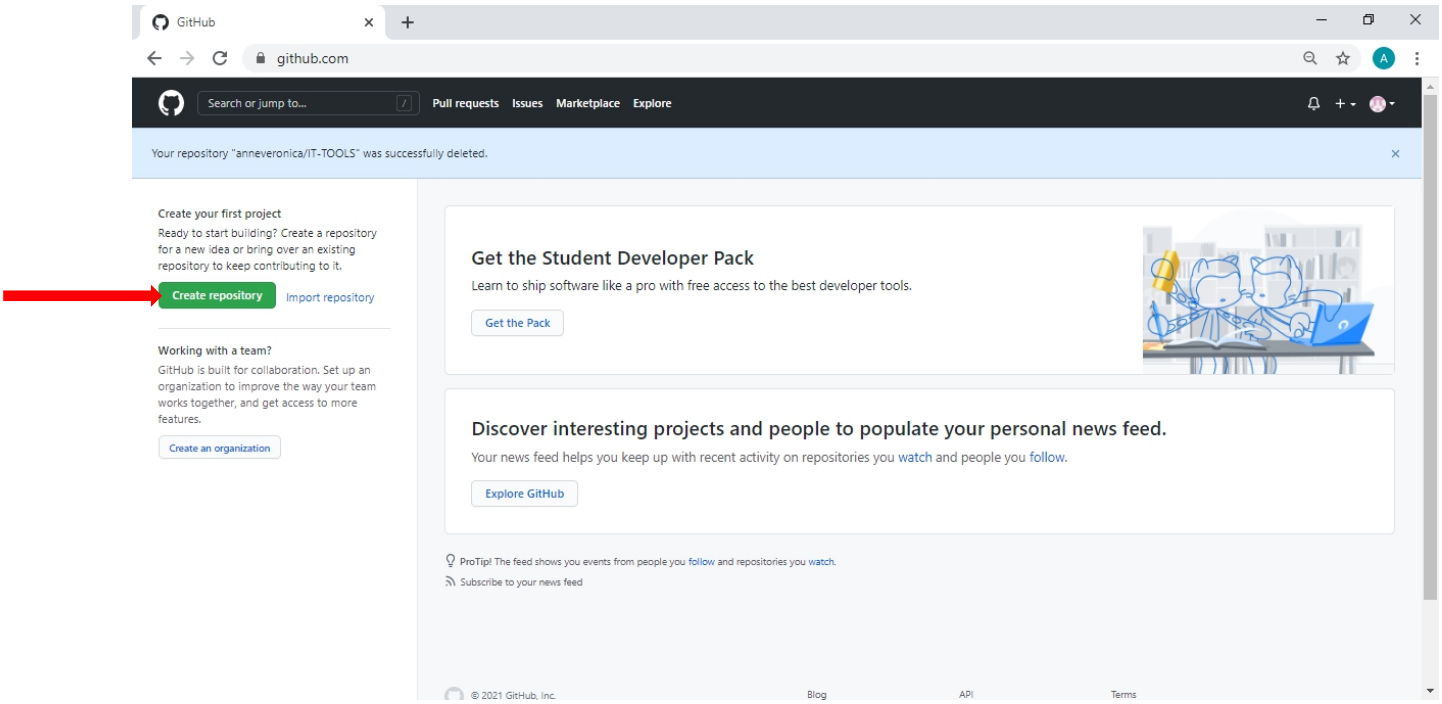


Step 2: “Create your account” page will appear. Enter your username, email address and password. Then click on the “verify” button. Once it is verified then click on the “Create Account” button and your account is created.

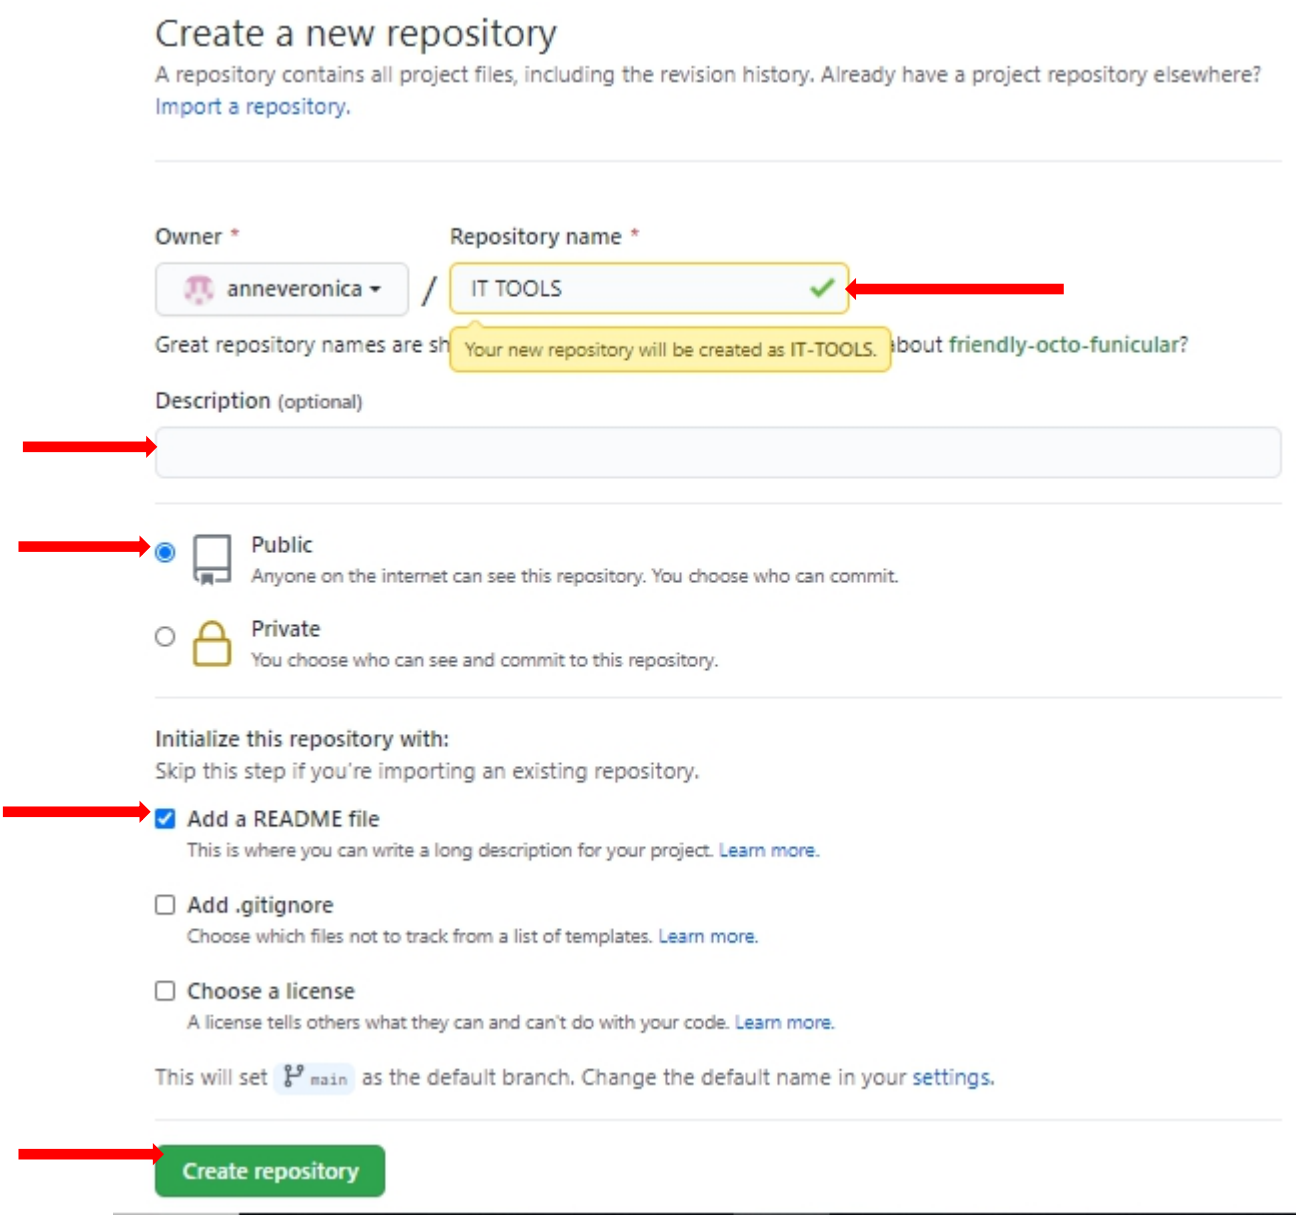


b) Creating Repository

Step 1: Click on the “Create repository” button which is in the left side of the page.



Step 2: Once you click on the create repository button, a page is displayed. Provide your repository name and you can give some description about your repository. Then choose a repository visibility option and click on “Create repository” option.



c) Cloning Repository

Step 1: In the main page of the repository, click on the option “Code” and then click on the copy symbol and your repository has been cloned.
